Slick Tape

When using any drapery rods & rings on a regular basis, there will be some rod & ring abrasion that can create a dark powder residue over time. This residue can get the drapes dirty and is very expensive and hard to clean. Replacement is usually necessary. We strongly recommend using our slick tape that can be placed on the top of the rod with its own peel off self adhesive on the back. Just peel off the back and put on top of the rod. This will not only eliminate the rod & ring abrasion, but it will also make the rings slide much easier & smoother, especially on larger rods, heavy drapes, and rods up high. Our Slick Tape is self lubricating and is custom made narrow just for our drapery rods. It is 1/4" wide, 1/32" thick, and sold in a 50 ft roll for \$75.00 Retail.

Notes: Rods need to be clean and free of any silicone spray.
If slick tape is removed from rod, it can pull off paint.

Slick Tape # 2019 - 50 ft roll 1/4" wide, 1/32" thick for \$75.00 Retail
